

Alain D. Patrick RAMANATANANA

IT architect, auto entrepreneur

I am an experienced IT professional specializing in facilities management, with a strong focus on operating systems, networks, and peripheral administration. Since 2013, I have successfully helped businesses optimize their IT assets and provided top-tier technical support.

As a web developer, I have contributed to the design and development of various websites using technologies like Hugo, Wowchemy, and Netlify. My expertise in systems integration and content management enables me to build intuitive and efficient user interfaces.

Additionally, I have significant experience in implementing open-source solutions such as Nextcloud and Odoo to enhance business productivity and streamline operations.

I am also a musician, composer and guitarist with the bands KatZenJam and OLO Blaky.

I also teach music.
